It'll come back as a "user identification request". How do I see it? And the "action confirmation request" will come, how do I see it? And how do I know when the "action confirmation request" will come? I actually thought that the request and its answer would come after that. And it turns out that everything is more confused than I thought. And how do I know where from and what came to the box? A will come "request for user identification. If it appears when you open it, there may be another tab in the browser with the same address, which opens in a new window and appears in the "bookmark" in the history of visits. This is the bookmark you need to look at. I'm not going to write how to watch the link in the browser, otherwise someone won't get to the end of this article. Especially since it's all written there. And you can do this with any browser, even if it doesn't support HTML5. If you do not know how to do it, you can ask in the comments. I will tell you. To delete all information from your profile, you have to perform a number of actions. 1. Go to your social network account page, which requires registration. 2. In the upper right corner, in the drop-down menu, select "Help". 3. In the first window that opens, select the category of the question. In our case, it will be "I have a question about creating an account." 4. Scroll to the end of the page that opens, and click on "How do I delete my account?" at the very bottom. After that, a window will open where you need to specify your account password and username. 5. Click on the button "Delete account". After that, you will be offered a form to fill in, where you need to specify the reason for deletion. 6. After you have filled in all the fields, click on "Delete account". After that you only need to confirm the deletion of your account. To do this, open your email, to which you previously registered the account. There will be an email from Instagram asking you to confirm the account deletion.
